[Higher temperatures raise the heat on upland birds](#)

29 APRIL 2009

Warm summers are dramatically reducing populations of daddy long legs, which in turn is having a severe impact on birds that rely on them for food, RSPB Scotland scientists have shown (See Editor's note 4). This key finding comes from a new study by

The 2nd annual Archant London Environmental Awards are taking place at New Providence Wharf Radisson, on Friday 20th November 2009.

The finalists of these prestigious awards will be announced on Friday 6th November, and will be invited along to this wonderful ceremony in the heart of London's thriving Docklands area, where guest host Penney Poyzer, the UK's first TV exponent on green lifestyle and consumerism, will be presenting the awards.

A big thank you to all those of you have taken part in these awards, and we wish all of our finalists the very best of luck.

Watch this space for the winners' names and details, which will be announced on Monday the 23rd November 2009.

Penney Poyzer will take the stage at the Archant London Environmental Awards, to help crown schools, businesses and households in the 2009 Archant London Environmental Awards.

Penney was the UK's first TV exponent on green lifestyle and consumerism. Star of BBC2's NO WASTE LIKE HOME and of numerous other TV and radio appearances, Penney continues her journey into finding how to live a low carbon life with a high enjoyment factor.

Penney Poyzer
Keynote Speaker

She has been working on her third book and has also forayed into the world of academia as a visiting lecturer to Nottingham Trent University.

Penney has been developing a masterplan for low carbon urban regeneration which is taking root in Nottingham. She is busy on the keynote speaker circuit enlivening deep green thought with light green laughter.

She has been working with students of all ages to question whether our current curriculum is teaching our students what they need to know in the context of a rapidly changing climate. She works closely with businesses, charities, agencies and low income communities to help them activate low carbon living, working and learning.

She is also spearheading the development of the National Fruiting Forest, a network of orchards and fruit groves linking city to countryside and providing free food for all.

She lives in the Nottingham ecohome with her husband Gil Schalom and their daughter Jasmine. Their home was the UK's first radical eco-retrofit of a Victorian villa and has been hailed as a pioneering project of national significance.

Penney is patron of and trustee of a number of green charities which no doubt explains why Archant London have chosen her to host this year's event.
